SnapLogic Beginner Training

Audience — SnapLogic integration developers

Target Group — Integration developers, data scientists, citizen integrators, admins, and managers

Duration — 2 Days

Description — We've designed our SnapLogic Beginner Training to bring you up to speed on SnapLogic platform capabilities with an introduction to the concepts of developing integrations using the SnapLogic Intelligent Integration Platform (IIP). This course introduces customers to the IIP: SnapLogic Designer, Manager, and Dashboard, and provides hands-on labs for integration development.

The training covers key topics like SnapLogic Architecture, Tasks, Triggered tasks, Expression Language, and more, to enable users to use SnapLogic platform features to build, monitor, and maintain the integrations.

This is an instructor-led training with an option of in-person or virtual trainings based on the needs of the customers.
